### Abstract

Jihadi management is one of the most important approaches to advancing the goals of the Islamic Revolution. Imam Khamenei considers Jihadi management as the way to achieve the goals and objectives of the Islamic Revolution, so he believes that this cannot be achieved through laziness. On the other hand, the statement of the second step of the Islamic revolution is a method to reach this goal, so the main goal of this article is to construct Jihadi management with emphasis on the statement of the second step of the Islamic revolution. The question is: how can jihadi management be constructed? This research used descriptive and analytical method and used Giddens construction theory. Research findings show that for the construction of jihadi management based on the statement of the second step of the Islamic Revolution; Both agents should believe in jihadi management and structures should be designed based on jihadi management. Finally, it is suggested that the operationalization strategies of each of these findings be carried out in separate research.
