

Indicating Spiritual Intelligence Regarding Imam Khomeini's Divine-Political Will

Mojtaba Norouzi^{1*}, Zohreh Marandi²

Abstract

The design of spirituality is one of the most important issues in the industrialized and technological world today, which is the link between tradition and modernity. Inner faith, belief and belief underlie what is called spiritual intelligence in the light of spirituality. Spiritual capital is both constructive and constructed by society. At the same time as societies grow, in order to create change and change, an individual needs a vision that can make sense of his goals, develop his capacity and ability in the path of change, and be an important factor in countering instabilities and evils. Robert Emmons is one of the theorists in the field of spiritual intelligence who has tried to analyze religious intelligence and its impact on human beings by characterizing it. In this research, an attempt has been made to explore the divine-political will of Imam Khomeini (as) as a text that has elements of spiritual intelligence. Critical thinking, semantics, transcendent awareness and self-awareness reflected in Emmons' theory are the main concerns of this research in explaining the will. Therefore, in response to the question, what are the most important characteristics of spiritual intelligence in the text of the will of the late Imam? This research examines the moral and religious gifts of Imam's thought such as infallibility, religious education, responsibility and freedom, meaning to life and the goal of faith insight, following religious orders and following its preachers and being aware of human abilities and Religion itself has an impact on society. With all these factors, one can think of spiritual intelligence in ending falsehood and realizing the truth in Imam's will.

Key words: Spiritual Intelligence, Robert Emmons, The Divine-Political Will of Imam Khomeini.
